On January 2, 2019, San Gabriel filed its GRC Application A.19-01-001 with the CPUC, requesting to increase water rates. The Application requests rate increases in its Los Angeles County and Fontana Water Company Divisions covering the fiscal years (July - June) 2020-2021 through 2022-2023. San Gabriel has requested total revenue increases (in both its Los Angeles County and Fontana Water Company divisions) of \$13,726,700 or 9.6% in July 2020, \$11,574,300 or 7.3% in July 2021, and \$6,981,100 or 4.1% in July 2022.

LOS ANGELES COUNTY DIVISION CUSTOMER IMPACT

If approved by the CPUC, the effects of the proposed increases on the various customer classes in the Los Angeles County Division are shown as follows:

<u>Customer Class</u>	Requested Increases by Year and Customer Class (Dollars in Thousands)

If the proposed rates are approved by the CPUC, the average monthly bill for a residential customer with a 5/8 x 3/4-inch meter using 12 hundred cubic feet (Ccf) (8,977 gallons) of water will increase as follows (includes the CARW¹ surcharge):

Residential Customer	Present Rates ²	Proposed 2020 Increase	New Bill	Proposed 2021 Increase	New Bill	Proposed 2022 Increase	New Bill
12 Ccf	\$63.31	\$4.35 (6.9%)	\$67.66	\$6.18 (9.1%)	\$73.84	\$3.69 (5.0%)	\$77.53

The monthly charge for private fire service would increase from \$14.54 currently, to \$16.15 or 11.0% on July 1, 2020, \$17.65 or 9.3% on July 1, 2021, and \$18.57 or 5.2% on July 1, 2022, per inch diameter of service.

San Gabriel also requests to make payments to pay off the balances in some reserve accounts³, the impact of which cannot be determined at this time.

REASONS FOR REQUESTED INCREASES

The principal reasons for the requested rate increases include:

- Declines in per-customer water sales,
- Increases in expenses for labor, materials and supplies, insurance, employee healthcare and benefits,
- The need to construct additional water facilities, including treatment facilities to remove 1, 4-Dioxane and N-Nitroso-dimethylamine (NDMA), water mains, pipes and service lines, storage tanks, pumps, meters, hydrants, supply wells, and
- The need to replace service vehicles to meet expected demands for service, and to assure continued compliance with all applicable safe drinking water quality standards.
